PROJECTS

Online Auction Website

03/2026 - Present

- Analyzed business requirements for core features: Item Posting, Bidding Logic, and Auction Session Management.
- Designed and executed a comprehensive suite of Test Cases for Login, Cart, and Product Search functions.
- Performed Black-box Testing to ensure UI/UX consistency across various screen resolutions.

Clinic Booking System

03/2026 - Present

- Utilized Katalon Studio to perform automated Functional Testing for appointment scheduling and patient record management workflows.
- Applied JMeter for Stress and Overload Testing, simulating high concurrent traffic to evaluate system stability.
- Validated data integrity between the front-end interface and the back-end database.

Gym Management System

2024-2025

- Conducted API Testing via Postman to verify the accuracy of JSON response data.
- Performed basic security testing and developed test scenarios based on user requirements.

PERSONAL ADVANTAGES

- Strong sense of responsibility and proactive work attitude.
- High learning agility and self-motivation.
- Open to feedback and continuous improvement.
